The information conveyed was of such a positive character that even those subscibers who in the past have been rather inclined to snift at the "tibs" sent out, decided to act on it to-day.

The very "biggest bugs" in the combine ducked for the cyclone cellars and had their hirelings put up the shutters and close the doors, so that even Capt. Chapman's axe would avail nothing if used.

The fact that one of the officers of the company is on trial to-day before Recorder Goff made the officials especially ansious that no further entanglements with the law should follow.
